

ComicCraft – AI Comic Story Creator

Project Design

ComicCraft uses a three-part architecture: frontend, backend, and AI integration.

Key Activities / Deliverables

- Frontend: HTML, CSS, and Jinja2 templates.
- Backend: FastAPI routes for input processing, AI coordination, layout building, and export.
- Gemini Flash: structured five-panel outline generation.
- Gemini Pro: detailed narration and character dialogue.
- Stable Diffusion: comic-style illustrations from image prompts.
- `layout_builder.py`: matches images with panel stories.
- `exporters.py`: compiles the comic into a multi-page PDF.
- Main templates: `index.html`, `comic_preview.html`, and `export_success.html`.
