

ComicCraft – AI Comic Story Creator

Project Planning

The project is organized into milestones that move from model selection and architecture through development, frontend work, and deployment.

Key Activities / Deliverables

- Milestone 1: Model selection and architecture.
- Research and select suitable generative AI models.
- Define the application architecture and development environment.
- Milestone 2: Core functionality development.
- Implement comic generation and FastAPI input processing.
- Milestone 3: routes.py development.
- Build and integrate the main application routes.
- Milestone 4: Frontend development.
- Create responsive HTML/CSS/Jinja2 pages.
- Milestone 5: Deployment.
- Prepare and verify local deployment.
