

ComicCraft – AI Comic Story Creator

Project Development

Development implements the planned ComicCraft workflow as modular Python functions and FastAPI routes.

Key Activities / Deliverables

- `generate_outline()` in `gemini_flash.py` creates the five-panel outline.
- `generate_story()` in `gemini_pro.py` creates narration and dialogue.
- `generate_image()` in `image_generator.py` creates and saves panel illustrations.
- `build_comic_layout()` in `layout_builder.py` organizes images and story text.
- `save_pdf()` in `exporters.py` creates the downloadable PDF.
- `/generate` connects the complete form-based generation pipeline.
- `/generate-comic/json` provides the API workflow.
- Jinja2 templates display generated results to users.
