

ComicCraft – AI Comic Story Creator

Project Testing

Testing focuses on verifying the complete generation workflow and the local FastAPI deployment.

Key Activities / Deliverables

- Test story prompts with different characters, settings, tones, and art styles.
- Check that the five-panel outline is generated correctly.
- Verify narration and dialogue are produced for every panel.
- Test image generation and saved image paths.
- Verify layout pairing between images and panel text.
- Test PDF generation and download flow.
- Test `/generate`, `/generate-comic/json`, `/test-image`, and `/export-success` routes.
- Run the application locally with Uvicorn and verify the homepage and `/docs` interface.
